

Frequently Asked Questions

What is an LED video wall?

An LED (Light Emitting Diodes) video wall is a modular display system made up of 500mm x 500mm seamless cabinets that connect together to create one large display.

Can I have multiple walls of different sizes?

Yes, a mixture of any size walls that you wish. Our LED screens can be built in custom shapes, formats, and scale for both indoor and outdoor events.

What can I display on an LED video wall?

Any content that you would output through a traditional display.

How do I operate an LED video wall?

The wall would be installed and configured by our expert technicians and set to an input of your choice i.e., a laptop and simply used as you would any traditional screen. However, for more complicated visuals, such as live camera feed and multiple sources it would be advisable to have one of our video production specialists onsite to manage all aspects of your content.

How much does it cost to rent an LED video wall?

We offer many options to suit any budget but there are several factors to consider when pricing up a rental, it depends on the size, duration of the rental, location and how the screen will be supported.

Reasons to choose an LED video wall

- ✓ Can be built to any size or shape
- ✓ Can be used for outdoor events*
- ✓ Much brighter and better black levels compared to a projection system
- ✓ High definition crystal clear display

LED video walls bring the wow factor, offering seamless content to engage your audience and breathe life into your event

*Outdoor external waterproof screens only.
